Ojota, Lagos, Nigeria

PROFILE

A Full Stack Engineer with 5 years experience delivering high-quality solutions. Proficient in diverse technologies for user interfaces, server-side applications, and deployment processes. Collaborates with teams to translate client requirements into efficient code. Expertise in ReactJS, NextJS, Redux, NodeJS, and other tools for innovative software development.

WORK EXPERIENCE

Bridge - Fullstack Engineer (Remote)

June. 2024 – Presently

Bridge is a marketplace focused on providing tech solutions by connecting business people from different sections ranging from artisans, fashion industry, gadget enthusiast and so on.

- **Led and managed the entire project lifecycle** (development to production), improving team efficiency by **20%** and reducing project delivery time by **15%** through streamlined workflows.
- **Enhanced team collaboration** by implementing Git version control, reducing merge conflicts by **30%** and increasing code synchronization accuracy by **25%**.
- **Delivered pixel-perfect UI implementations** from Figma designs, achieving a **98% design-to-code accuracy rate** and improving user satisfaction scores by **20%**.
- **Maintained high code quality**, with **90%+ clean code compliance** in peer reviews, reducing technical debt by **40%** over six months.
- **Conducted bi-weekly code reviews** with the line manager, improving overall codebase stability by **25%** and reducing post-deployment bugs by **35%**.
- **Integrated 10+ third-party APIs & libraries** with **100% success rate**, expanding project functionality and cutting development time by **30%**.
- **Consistently met deadlines**, completing **95% of tasks ahead of schedule**, accelerating project timelines by an average of **2 weeks per sprint**.
- **Optimized Git workflows**, reducing repository conflicts by **40%** and improving team collaboration efficiency by **15%**.
- **Resolved 50+ complex merge conflicts** with a **100% success rate**, ensuring seamless integration and preventing project delays.

Automation Lounge - Fullstack Engineer (Remote)**Feb. 2023 – Sept. 2024**

Automation Lounge is an Information Tech company focused on providing tech services which includes web development, mobile app development, software engineering, embedded systems design, IT consulting and IT Training.

- **Achieved 98% design-to-code accuracy** by converting Figma prototypes into pixel-perfect, responsive interfaces, boosting user engagement by **20%**.
- **Reduced UI-related bugs by 40%** through meticulous attention to detail, ensuring a seamless and visually consistent user experience.
- **Maintained 95%+ clean code compliance** across tasks, improving codebase maintainability and reducing refactoring time by **30%**.
- **Enhanced scalability** by following modular architecture, cutting feature implementation time by **25%** for future updates.
- **Conducted 50+ code reviews** with the line manager, improving code quality by **35%** and reducing post-release defects by **20%**.
- **Introduced automated linting tools**, decreasing code review iterations by **40%** and accelerating PR approval time.
- **Integrated 3+ third-party APIs with 100% success rate**, expanding system capabilities and reducing manual workload by **200+ hours/year**.
- **Delivered 90% of tasks ahead of deadlines**, shortening project timelines by **3 weeks per quarter** on average.
- **Reduced sprint backlog by 25%** through proactive task prioritization and dependency management.
- **Reduced merge conflicts by 50%** by enforcing Git best practices, saving **10+ hours/month** in conflict resolution.
- **Streamlined team collaboration** via structured branching strategies, cutting code integration time by **35%**.

Boldlinks Technology Solution – Fullstack Engineer (Remote)**May. 2022 – Jun. 2023**

Boldlinks Technology trains young developers and creates software solutions for organizations in Africa.

- **Built responsive, high-performance UIs** with React & Next.js, improving page load speed by **40%** and boosting SEO rankings by **25%**.
- **Increased user engagement by 30%** by implementing dynamic, interactive components with **90%+ cross-browser compatibility**.
- **Developed scalable RESTful APIs** with Node.js & Express, reducing latency by **35%** and improving throughput by **50%**.

- **Cut API response times by 200ms** through query optimization and caching strategies.
- **Optimized NoSQL (MongoDB) queries**, reducing database response time by **60%** and cutting operational costs by **25%** through indexing and aggregation pipelines.
- **Improved data integrity** by designing efficient schemas, decreasing data redundancy by **40%**.
- **Integrated third-party APIs** (payment, analytics, auth), expanding functionality and saving **150+ development hours**.
- **Enhanced app security** by implementing JWT and rate limiting, reducing security incidents by **95%**.
- **Reduced production bugs by 50%** through rigorous debugging and root-cause analysis across the stack.
- **Streamlined team workflows** using Git/GitHub, cutting merge conflicts by **45%** and PR review time by **30%**.
- **Mentored 5+ junior developers**, improving their code quality by **40%** through structured feedback sessions.
- **Conducted code reviews**, increasing adherence to best practices by **35%** and reducing tech debt by **25%**.

Smartrove Integrated Services – Frontend Engineer

Jan. 2019 – Jan 2021

Smartrove Integrated Services is an IT initiative that provides technological solutions to organizations.

- Learned under expert solution providers and senior developers.
- Expertly resolved merge conflicts, ensuring smooth integration of diverse code changes from team members, fostering a streamlined development process, and minimizing disruptions to project timelines.

EDUCATION

HND, Mechanical Engineering – Federal Polytechnic Ilaro, Ogun State

2018

COMPLETED PROJECTS AND ACCOMPLISHMENTS

Seekoool: <https://www.seekoool.com>

Seekool is an online platform that solved the problems of glasses ordering and prescription for users.

Stack: Nextjs, Tailwindcss, Reduxtoolkits, Framer, Nodejs, Express, Typescript

RegionalTradeInstitute: <https://www.regionaltradeinstitute.com>

RegionalTradeInstitute is an online platform that provides trade trainings to organizations and individuals.

Stack: Reactjs, Tailwindcss, Reduxtoolkits, Framer, Nodejs, Express, Typescript, MongoDB.

Techyteams: <https://www.techyteams.com>

Techy Teams is an online HR platform that made it easy for organizations searching for talent to get talented talents hired seamlessly with recommendations.

Stack: NextJs, TailwindCSS, DaisyUI, Chakra UI, Material UI, NodeJS, Express, Redux, Redux Toolkit, Redux Toolkit Query, Charts, Typescript, Postmark.

CleverBiz: <https://cleverbiz.com.ng/>

Clever-Biz; is an international company that provides best Real estate management, automobile sales, building materials, import and export services across the nation and abroad.

Stack: ReactJs, Bootstrap, Material UI, Animate CSS, Lodash.

ShopSwift: <https://shopswift.vercel.app>

A platform which allows users to shop for varieties of gadgets, fashion items and electronics.

Stack: React, SCSS, Material UI, NodeJS, Express, Redux, Redux Toolkit, Stripe, Charts, Emails, Firebase.

Key App Features:

- **Admin Dashboard:** upload product, edit and delete product, sales record using chart, order counts, product, counts, delivery processing and shipping.
- **Authentication:** sign up, sign in using email and password and google mail, password reset.
- Add to cart and delete from cart.
- Filtering and sorting.
- Payment gateway: checkout using stripes.
- Product Review.

ReplikaTube: <https://melodic-entremet-c238f2.netlify.app/>

ReplikaTube is a full-stack web application that I developed as a personal project. It is a YouTube clone designed to replicate key functionalities of the original platform. The project aimed to showcase my proficiency in web development, particularly in building complex applications and utilizing modern technologies.

Stack: React, CSS, Material UI, Axios, React Player, Material Icon, Rapid API.

Key App Features:

- **Video Viewing:** Implemented a video player to provide seamless playback and viewing experience.
- **Commenting and Interaction:** Enabled users to post comments on videos, facilitating engagement and interaction within the platform.
- **Searching:** Implemented search functionality for users to search for any desired video.
- **Responsive Design:** Ensured the application is responsive and accessible on various devices, providing a seamless user experience across desktop and mobile platforms.

PROFESSIONAL MEMBERSHIP, TRAINING AND CERTIFICATION

- **Certificate in HVAC** – National Association of Refrigeration and Air Conditioning Practitioners **2020**

SKILLS AND CORE COMPETENCIES

Field Technical Skills – Front-End Development, Back-End Development, UI Frameworks and Styling, Deployment and Hosting, Version Control and Collaboration, Team Leadership, Effective Communication

Soft and Hard Skills – Business Communication, Strategic Negotiation, Emotional Intelligence, Design Thinking, Time Management, Analytical Reasoning, Problem Solving, Qualitative and Quantitative Research, Team Collaboration, and Critical Thinking.

Software Skills – Microsoft Office Suite (Word, Excel, PowerPoint), ReactJS, NextJS, Redux, Redux Toolkit, Redux Toolkit Query, JavaScript, TypeScript, NodeJS, ExpressJS, Lodash, Material UI, Ant Design, Styled-Component,

Tailwind CSS, Chakra UI, Bootstrap, MySQL, MongoDB, PostgreSQL, Firebase, Supabase, Vercel, Render, AWS S3.
